

PIPE WELDING ACCESSORIES

WWW.DWT-PIPETOOLS.COM

THE DWT COMPANY

is a private owned sales, production and service company in the Ruhr region, the industrial heart of Germany. The headquarter, warehouse, production and service centre are located in Bottrop. From there, numerous markets in Germany and abroad are served.

Since 1995, the export business has also been expanded, and customers are now supplied in over 30 countries around the world.

In many regions we have a representative office to support the local market.

MACHINE OVERVIEW

Interesting DWT products for pipe machining

PIPE BEVELING MACHINES

Perfect weld seam preparation through mechanical chamfering of the pipes

The pipe beveling machines are used for beveling pipes and for pipe end machining of nozzles and headers. In addition, the machines are also suitable for fin tubes, boiler tubes, membrane wall and heat exchangers for pipe end machining in both workshop and construction site use. Particularly in connection with orbital welding, economic manufacturing possibilities arise.

Internal and external clamping pipe milling machines

Mobile pipe beveling machines for perfect weld seam preparation

The transportable pipe beveling machine is used for weld seam preparation when welding thick-walled pipes, boiler tubes and headers. Due to an extremely compact design, pipes can be beveled perfectly even in confined spaces.

- High cutting and separating performance
- Quick and safe clamping
- Easy handling, low weight

DLW-Cut and Beveling machines Cutting thick-walled pipes on site

The pipe cutting and beveling machine is used to cut and bevel thick-walled pipelines in explosive areas such as e.g. oil and gas platforms, nuclear power plants and other explosion-protected areas.

- Cold cutting and beveling of thick-walled steel pipes (no heat-affected zone)
- For pipes up to an outer diameter of 1219,2 mm and a wall thickness of 80 mm
- Extremely light weight and small footprint

Boiler Panel Saw Type BWC Separation of boiler and fin tubes

The cutting of boiler tubes during inspection and maintenance in boiler construction without a heat-affected zone is a prerequisite for good weld preparation.

- Higher occupational safety
- High productivity and cutting quality
- No heat-affected zone

CPC / CPC-B Chain guided pipe cutting and beveling machine

Pipe cutting and beveling, directly on the construction site. The CPC-B type pipe cutting and beveling machine offers a versatile solution for almost all cutting and beveling applications. The machine is convincing in the most difficult conditions and can even be used under water and cut pipe thicknesses up to 50 mm separate.

- For pipes up to 276" (7,010 mm)
- Compressed air and hydraulic drives available for use in non-sparking environments
- Also suitable for beveling high-strength stainless steel pipes

EXACT PIPE SAWS THE ORIGINAL PIPE CUTTING SYSTEM

The Exact pipe saws replace angle grinders and other bulky, dangerous tools that have to be readjusted after every cut. The light and comfortable Exact pipe saws increase your productivity and work quality many times over.

With the Exact Pipe Cutting System, pipes made of any material are cut quickly, easily and above all safely within seconds. They offer the highest level of safety for users and the environment and deliver perfect work quality.

By using the Exact pipe saw, the risk of an accident at work is minimised by almost 100%.

Since 2012, DWT GmbH has is promoting Exact pipe saws in more than 20 countries around the world. This gives us the optimal opportunity to offer you the complete service for your pipe saw.

Advice, product demonstration (online or at your premises), sales, rental, service and repair - all from a single source.

- Highest level of safety for users and the environment
- Perfect cut ends for direct further processing
- Excellent speed

PIPE ALIGNMENT

Centre and align all materials and dimensions

PIPE CLAMPS

Pipe clamp steel

Clamping Range: 25 - 355 mm (1 - 14")

- For centering and aligning the pipes to be welded
- Easy assembly

Part No.	Description	Range OD Inch	Range OD mm	Weight kg
RG350004	Pipe clamp DWT S13 steel	1 - 3	25 - 76	1,5
RG350005	Pipe clamp DWT S25 steel	2 - 5	51 - 127	3,1
RG350006	Pipe clamp DWT S47 steel	4 - 7	102 - 177	3,3
RG350007	Pipe clamp DWT S59 steel	5 - 9	127 - 228	6,9
RG350008	Pipe clamp DWT S1014 steel	10 - 14	254 - 355	9,0

Clamping screws

for quick-release pipe clamps
steel and stainless steel

- Replacement screws suitable for steel and stainless steel pipe clamps

Part No.	Description
RG350009	Clamping screw steel for S13
RG350010	Clamping screw steel for S25 & 47
RG350011	Clamping screw steel for S59 & 1014
RG350096	Clamping screw stainless steel for SS13
RG350097	Clamping screw stainless steel for SS26
RG350098	Clamping screw stainless steel for SS614

Pipe clamp stainless steel

Clamping Range: 27 - 355 mm (1 - 14")

- For centering and aligning the pipes to be welded
- Easy assembly and centric clamping of the pipes
- Stainless steel contact points avoid corrosion
- Tensioning screws with stainless steel balls prevent scratching of stainless steel pipes

Part No.	Description	Range OD Inch	Range OD mm	Weight kg
RG350012	Pipe clamp DWT SS13 stainless steel	1 - 3	25 - 76	1,0
RG350013	Pipe clamp DWT SS26 stainless steel	2 - 6	51 - 152	3,5
RG350014	Pipe clamp DWT SS614 stainless steel	6 - 14	152 - 355	8,0

SPC External pipe clamp

Clamping Range: 10 - 140 mm (0.3 - 5.5")

- Each pipe side is centred by means of a crank
- Can align different pipe diameters with each other
- Stainless steel contact points

Part No.	Description	Range OD Inch	Range OD mm	Weight kg
RG350025	External pipe clamps SPC1070 stainless steel	0.3 - 2.7	10 - 70	2,0
RG350026	External pipe clamps SPC40140 stainless steel	1.5 - 5.5	40 - 140	5,3

Single chain clamp

Clamping ranges: 203,2 - 1.524 mm (8 - 60")

- Max. Wall thickness: 12,7 mm
- The chain can be adapted to the respective pipe dimension by removing the chain links and alignment levers

Part No.	Description	Range OD Inch	Range OD mm	Number jack-bars	Weight kg
RG350040	Single chain clamp	8 - 10	203 - 254	5	8,3
RG350041		8 - 12	203 - 304	6	9,5
RG350042		8 - 16	203 - 406	7	10,6
RG350043		8 - 20	203 - 508	9	13,0
RG350044		8 - 24	203 - 609	11	15,3
RG350045		8 - 28	203 - 711	13	17,7
RG350046		8 - 32	203 - 812	14	18,8
RG350047		8 - 36	203 - 914	16	21,2
RG350048		8 - 40	203 - 1.016	18	23,5
RG350049		8 - 44	203 - 1.117	19	24,7
RG350050		8 - 48	203 - 1.219	21	27,0
RG350051		8 - 52	203 - 1.320	23	29,4
RG350052		8 - 56	203 - 1.422	25	31,7
RG350053	8 - 60	203 - 1.524	26	32,9	

Accessories

for single chain clamp

- Individual solutions through modular individual parts

Part No.	Description	Weight kg
RG350068	Swivel for single chain	2,2
RG350069	Single jack-bar	0,8
RG350070	2-link chain	0,2
RG350071	3-link chain	0,3
RG350072	2-link chain with jack-bar	2,5
RG350073	3-link chain with jack-bar	1,2

3-link chain with jack-bar
(177 mm length)

2-link chain with jack-bar
(137 mm length)

Swivel

3-link chain

Internal clamping system (IC)

for pipes and flanges

Clamping range: ID 15 - 64 mm (0.5 - 2.5")

The manual internal clamping system (IC) is suitable for clamping pipe to pipe or flange. It covers a range from 15 mm (0.5") to 64 mm (2.5"), with automatic diameter compensation.

The contact points of the systems are made of stainless steel, which means that both mild steel and stainless steel pipes can be centred.

Part No.	Description	Range ID Inch	Range ID mm	Weight kg
RG350191	Internal clamping system IC1519	0.59 - 0.75	15 - 19	0,2
RG350192	Internal clamping system IC1620	0.63 - 0.79	16 - 20	0,2
RG350193	Internal clamping system IC1925	0.75 - 0.98	19 - 25	0,25
RG350194	Internal clamping system IC2432	0.94 - 1.26	24 - 32	0,5
RG350195	Internal clamping system IC3140	1.22 - 1.57	31 - 40	0,5
RG350196	Internal clamping system IC3852	1.50 - 2.05	38 - 52	1,25

Internal clamping system (ISC)

for pipes and flanges

Clamping range: ID 56 - 520 mm (2.25 - 20.4")

The manual internal clamping system (ISC) is suitable for clamping pipe to flange. It covers a range from 56 mm (2.25") to 520 mm (20.4").

The contact points of the systems are made of stainless steel, which means that both mild steel and stainless steel pipes can be centred.

Part No.	Description	Range ID Inch	Range ID mm	Weight kg
RG350015	Internal clamping system ISC56140	2.2 - 5.5	56 - 140	1,35
RG350016	Internal clamping system ISC85220	3.3 - 8.6	85 - 220	4,0
RG350017	Internal clamping system ISC120350	4.7 - 13.8	120 - 350	12,0
RG350018	Internal clamping system ISC180520	7 - 20.4	180 - 520	27,0

Internal clamping system (ISEC)

for flanges and elbows

Clamping range: ID 56 - 520 mm (2.25 - 20.4")

The manual internal clamping system (ISEC) is suitable for clamping pipe or flange to elbow. It covers a range from 56 mm (2.2") to 520 mm (20.4").

The contact points of the systems are made of stainless steel, which means that both mild steel and stainless steel pipes can be processed.

Part No.	Description	Range ID Inch	Range ID mm	Weight kg
RG350019	Internal clamping system ISEC56115	2.2 - 4.5	56 - 115	1,0
RG350020	Internal clamping system ISEC85195	3.3 - 7.6	85 - 195	3,0
RG350021	Internal clamping system ISEC120315	4.7 - 12.4	120 - 315	10,0
RG350022	Internal clamping system ISEC180520	7 - 20.4	180 - 520	24,0

Hydraulic external cage clamp

Medium-duty version
DN 300 up to DN 2000

Due to the widely recessed bridges of the hydraulic external pipe centering, up to 90% of the root pass can be welded without loosening the centering. The edge offset is eliminated by driving the splitting iron under the obliquely chamfered bridges.

The product does not contain a hydraulic cylinder.

Hydraulic cylinder

Hydraulic cylinder AHZ-5.4

For all nominal diameters of the external pipe centres mentioned on the right.

Hydraulic external cage clamp

Super heavy-duty version
DN 600 up to DN 1.800

Super heavy-duty Hydraulic external cage clamp with built-in hydraulic jack and curved bridges for perfect access and freedom when welding.

The hydraulic cylinder is equipped with a locking device and is secured against the housing with a ring on the trapezoidal threaded piston stand after pressing on. The cylinder should be used in the vertical position.

Mechanical external cage clamp

Light version
DN 80 up to DN 450

The mechanical external cage clamps in light design are suitable for the range DN 80 - DN 450 and only for tacking. The pipe ends are clamped via the eccentric by means of bars.

Part No.	Pipe size	OD Inch	OD mm	Weight kg
11 003 0088	DN 80	3	88	5,3
11 003 0114	DN 100	4	114	6,0
11 003 0125	DN 125	5	141	6,3

11 003 0457	DN 450	18	457	24,5

Other sizes on request.

Mechanical external cage clamp

Medium-duty version
DN 100 up to DN 1.200

The widely recessed bridges allow up to 80% of the root pass to be achieved without loosening the centering. The pressure screws allow deformed pipes to be aligned so that flush tacking is possible.

CAPACITY 1500 KG

PIPE PURGE SYSTEMS for pipe welding

When welding stainless steel pipes, the pipe should be purged or shielded beforehand to ensure the corrosion resistance of the materials. The purpose of forming is to create or maintain a high-quality surface condition of the root with regard to oxidation and root shaping.

Without pipe
purge systems

With pipe purge
systems

QUALITY OF THE WELD SEAM

Inert, reducing or inert gases are used for root protection. Gases are used for root protection such as pure nitrogen, mixtures (purging gases) of hydrogen and nitrogen, argon-hydrogen mixtures or pure argon.

OCCUPATIONAL SAFETY

Measures must be taken when welding complex materials to prevent the risk of ignitable gas mixtures and the uncontrolled ingress of unwanted air.

WE HAVE THE SOLUTIONS!

With our pipe purge systems, aluminium pipe stopper, oxygen monitors, weld backing tape and water soluble purge films, you can purge stainless steel pipes quickly and easily and thus protect the weld seam from oxidation and sparks.

I-PURGE-X PIPE PURGE SYSTEM

Modular pipe purge system

Available for internal pipe diameter ID 2 - 48"

A system for purging the pipes. Unique modular design for a customised solution

- Highly resilient inflatable inner cover
- Components can be replaced quickly and easily thanks to corrosion-resistant quick-release fasteners
- Made in the USA with the highest quality materials
- Spark retardant outer shell
- High heat resistance (optional extended length at higher temperatures)
- Flexible, kink-resistant connection for pipes, bends and T-pieces

- Preset pressure relief valves allow for precise flow rates, and reduce the risk of overloading the forming systems.
- Equipped with shielding gas diffuser to avoid turbulence of the gas flow during pipe welding (Diffuser not available for 2" and 3" types)
- 3-fold hose connection (1 filling of the bubbles; 2 rinsing of the welding zone; 3 connection of the oxygen monitors), accelerates the rinsing process
- Improves the efficiency of the gas flow in the purging area
- Carrying bag to protect the reed bubbles

Part No.	Description	Range Inch	Range mm
RG350220	Inflatable bladder system	2 - 3	51 - 76
RG350221	Inflatable bladder system	4 - 6	102 - 152

RG350226	Inflatable bladder system	38 - 48	965 - 1.219

Other hose lengths on request.

Oxygen monitor available on page 25-26

DWT Pipe purge system

For internal pipe diameters from 25 mm to 320 mm

The pipe purge system consists of a 200 mm long base unit and two sealing discs, which have a temperature resistance of up to 320 °C. The sealing discs can be used to seal the forming gas.

It can be easily pushed into the pipe without the system tilting or bending. The design ensures that one of the respective sealing lips seals, thus reducing gas consumption and forming time.

Complete systems

Each forming gas system includes 2 pcs. Sealing washers, 1 pcs. Base unit (200 mm), 10 m stainless steel pull cord, 10 m hose incl. coupling.

Part No.	Description	Diameter mm	Range ID mm
RG350116	Pipe purge system	32	25 - 31
RG350117	Pipe purge system	43	32 - 40

RG350115	Pipe purge sealing disc	330	290 - 320

Pipe purge sealing disc

Suitcase set

Suitable for internal pipe diameter 25 mm - 165 mm

- Handy complete set with pipe purge sealing discs and base unit (200 mm)
- Replaceable sealing discs
- Incl. 10 m stainless steel cable, 10 m hose, coupling and accessories
- High-quality and durable case made from a sustainable mix of materials

Part No.	Description	Internal pipe diameter mm
RG350139	Pipe purge system suitcase set	25 - 165 mm

ALUMINIUM PIPE STOPPER

Available for internal pipe diameters from 1,5"

The test stopper are made of cast aluminium. The expandable natural rubber ring ensures optimum sealing of the pipe. They are suitable for closing and sealing pipes during the forming process and for sealing in low-pressure applications.

- Extra long wing nuts for easy handling
- Hollow spindle for gas connection in forming applications
- Plastic cap closes the spindle for pipe seal measurements
- Cost effective solution
- Temperature resistant from -30 °C to +90 °C

WATER SOLUBLE PURGE FILM

Extremely stable and tear-resistant

- Dissolves completely after successful flushing (with water) and leaves no residue in the pipe
- Provides optimal conditions for a strong dam during the flushing process
- Suitable for welding stainless steel, duplex, chrome-molybdenum and titanium

Step 1: Clean the pipe.

Step 2: Apply water soluble film adhesive to the pipe.

Step 3: Cut out the water soluble film in a circular shape.
Circle should be 76 mm larger than the pipe circumference.

Step 4: Press the smooth surface of the water soluble film onto the adhesive in the pipe.

Part No.	Description	Unit
RG350215	Water soluble purge film (with 2x 250 ml adhesive)	1 x 20 m
RG350216	Water soluble purge film (without adhesive)	1 x 20 m
RG350214	Adhesive	250 ml

WELD BACKING TAPE

Alternative for conventional backwash methods

The weld backing tape is an innovative replacement for traditional back-flush methods that protect the back of the welding spot and ensure a high quality finish.

The weld backing tape reduces set-up, cleaning and welding time; eliminates grinding after welding and increases work efficiency while minimising costs.

- Reduces the set-up time
- Minimises the grinding effort after welding
- Increases welding performance, reduces costs
- Heat resistant
- Use for welding carbon or stainless steel
- Available in 64 mm x 12,5 m and 102 mm x 12,5 m

Part No.	Size	
RG350218	64 mm x 12,5 m	2" x 39"
RG350219	101,6 mm x 12,5 m	4" x 39"

Step 1: Carefully pull back the corners of the adhesive strips and remove the carrier film cover on both sides.

Step 2: The fiberglass fabric strips must be adjusted and attached to the back of the pipe joint.

Step 3: The aluminium adhesive tape must be applied slowly from the inside to the outside of the area around the pipe joint, this is the only way to ensure a tight seal.

The weld backing tape can be used with steel or stainless steel for welding pipe sheet and pipe sheet or pipe and pipe. The 1/4 gap between the sheet was welded with a 11 mm flux core. It is important to note that the glass fibres were not burnt and that no oxidation took place.

Water soluble paper

Purge gas dam with low air permeability for all pipe diameters

It is made from sodium carboxymethyl cellulose and wood fibres and dissolves immediately and completely in water and most liquids. It is 100% biodegradable and leaves no residue in the pipe.

- Forms an excellent insulation for noble gases
- Cost savings due to lower gas consumption, as the paper is placed in close proximity to the welding zone, which means that less shielding gas is required to replace the oxygen from the purge chamber.
- Can be easily attached to the inner wall of the pipe with the water soluble Aquasol adhesive tape, thus forming an airtight barrier

Part No.	Description	Unit	Size
RG350204	Water soluble paper	Roll	230 mm x 50 m
RG350205	Water soluble paper	Roll	390 mm x 50 m
RG350206	Water soluble paper	Roll	520 mm x 50 m
RG350202	Water soluble paper	Pack (500 sheets)	430 x 560 mm
RG350203	Water soluble paper	Pack (250 sheets)	390 x 560 mm
RG350209	Water soluble tape	Roll	25,4 mm x 91 m

EZ Zone tape

Clean welding without impurities

EZ Zone Tape is a purge gas masking tape that seals the weld gap between pipes, minimising gas loss during the purge process.

Due to the adhesive-free middle area, welding without contamination is possible.

- Halogen and fluorocarbon free
- Heat resistant
- Reduces pipe cleaning time and the amount of gas used
- Improves safety at your workplace
- Heat resistance up to 260 °C
- Minimum temperature application: -12.5 °C

Part No.	Size	Adhesive free zone
RG350211	63 mm x 22 m 2.5" x 75'	25 mm
RG350212	101 mm x 22 m 4.0" x 75'	50 mm

EZ Tape aluminum tape

Heat-resistant aluminium adhesive tape

EZ Tape is a traditional aluminium tape used for sealing c- measures during purging, as well as for sealing pipe ends for transport. It is coated with a heat resistant acrylic adhesive system against high shear forces.

The tape can be used in many other traditional applications, such as sealing pipes for heating or air conditioning systems. It is also an excellent vapour barrier.

- Halogen-free and fully coated with acrylic adhesive
- Soft film adapts well to irregular surfaces
- Suitable e.g. as a vapour barrier for sealing pipes

Part No.	Description	Size
RG350213	EZ Tape aluminum tape	50 mm x 20 m

Oxygen monitor Oxy-Pro

Measuring range 5 - 999 ppm O₂

- Suitable for inert gases and gases with a hydrogen content of max. 10 %
- Temperature controlled zirconium sensor
- USB interface for storing parameter sets
- Documentation of residual oxygen value, date, time value and name of the project
- Illuminated LED display with simple menu navigation
- Parameter input via keyboard
- Maintenance-free measuring cell made of zirconium oxide
- Long service life through intelligent cell management
- Freely adjustable working range
- Reminder of the validation process
- Robust plastic housing with protective rubber frame

Part No.	Description
RG350520	Oxygen monitor Oxy-Pro

Technical specifications

Measuring range	5 - 999 ppm O ₂
Power	110 V - 240 V
Interfaces	USB, 0 - 5 VDC, digital
Dimensions (LxWxH)	185 x 93 x 36 mm
Weight	600 g
System language	English and German
Power duration	Up to 8 hours
Sensor type	Zirconium oxide

- Scope of delivery:
- Hose set 1 m, including filter and stainless steel probe
 - Test certificate (validation)
 - Transport case
 - Power supply unit

Oxygen monitor PRO OX 100

Measuring range 0,00 - 21,00 % O₂

- Very fast response time <15 seconds
- Operating temperature 0° - 50°C
- Battery life up to 2 hours in trial mode
- Electrochemical oxygen sensor
- Calibration and test certificate
- Measuring accuracy 0,01 %(100 ppm)
- Integrated automatic pump
- Automatic calibration
- Data storage, up to 50 data sets
- USB interface for data transmission and storage
- Audio-visual alarm signal at the end of the flushing time
- Rechargeable 9V battery
- Backlight
- Windows-based software
- One year warranty on the sensor

Part No.	Description	Weight kg
RG350140	Oxygen monitor PRO OX 100	1,8

Technical specifications

Measuring range	0,00 - 21,00 % O ₂
Calibration	20,9 %
Gas for calibration	Environmental air
Response time	<15 seconds
Warm-up time	Insignificant
Substantial Humidity	0 - 95 % non-condensing
Operating temperature	0 ° - 50 °C
Storage temperature	3 ° - 20 °C
Sample flow	1.0 LPM max.
Proof pressure	10 PSI
Power	9V NiMh Battery
Power duration	Up to 2 hours in trial mode
Sensor type	Electrochemical oxygen sensor
Sensor life	12 months
Recommended calibration interval	weekly, depending on use-frequency
PC interface	USB Type B

Scope of delivery:

- Oxygen monitor PRO OX 100 with Sensor
- Polycarbonate carrying case
- 1,5 m hose with quick coupling
- Stainless steel measuring probe, 2 mm diameter
- Rechargeable battery with charger
- USB cable
- Holding frame
- Screwdriver
- Instructions for use

PIPE HANDLING

Pipe stands and pipe carts

Pipe stand foldable

Foldable, for mobile use

All pipe stands are supplied as standard with a V-head and safety ring to prevent unexpected collapse and injury. The foldable version with carrying handle makes it easy to put down and transport. The load capacity of the pipe stand is 1.500 kg. In addition, the heads are interchangeable and different sets of rollers are available.

- Quick lock washer for fast height positioning
- Safety adjusting screw
- Adjusting screw for locking the V-head
- Delivery incl. V-head

Part No.	Description	Weight kg	Height Inch	Height mm	Load capacity kg
RG350300	Pipe stand foldable and height adjustable	12	33.5 - 49.2	850 - 1.250	1.500

Ball & Roller Attachments

Steel rollers, stainless steel balls and polyethylene rollers for foldable pipe trestle

Please note that the above-mentioned attachments are always 2 required for 1 stand

Stainless steel balls

Polyethylene roller

Steel rollers

Part No.	Description	Load capacity (2 pieces) kg	OD Inch	OD mm	Weight (per piece) kg
RG350001	Stainless steel ball	925	1 - 20	25 - 500	1,8
RG350002	Polyethylene roller	450	1/2 - 16	12 - 355	1,1
RG350003	Steel rollers	450	1/2 - 16	12 - 355	1,3

Pipe stand Heavy Duty

For pipes up to 900 mm outer diameter

- 2.725 kg Load capacity
- Version „Medium“ and „Large“ foldable
- Height adjustable
- Additional securing of the V-head
- Delivery complete, incl. V-head

Part No.	Description	Height mm	Load capacity kg	Weight kg
RG350082	Pipe stand HD small with V-head	406 - 724	2.725	11,4
RG350083	Pipe stand HD medium with V-head	673 - 1.130	2.725	16,8
RG350084	Pipe stand HD large with V-head	914 - 1.549	2.725	21,4

Pipe stand Twin Stand

Outer pipe diameter from 108 - 900 mm

- Height adjustable from 80 cm to 130 cm
- Up to 2.000 kg load capacity
- Levelling on both sides of the support
- Use of quick change housings

*Quick change rolls not included in delivery. Please order separately!

Part No.	Description	OD mm	Weight kg
RG350185	Pipe stand Twin stand, foldable and height adjustable	108 - 900	16,4

Stainless steel

Nylon

Steel

Quick change roll sets

Quick-release housing for Twin Stand pipe stand
Load capacity: 900 kg (steel & stainless steel rolls) 550 kg (nylon rolls)

- Up to 900 kg load capacity (per set)
- No additional tools required for assembly, thanks to snap-in mechanism
- Rollers are already mounted in the quick change housings

Part No.	Description	Load capacity kg	Weight (je Set) kg
RG350187	Quick change nylon rolls for Twin stand	550	3,2
RG350188	Quick change steel rolls for Twin stand	900	3,6
RG350189	Quick change stainless rolls for Twin stand	900	3,6

Mobile pipe stand MAXI FLEX

Suitable for pipe storage and pipe transport

The versatile Maxi Flex is the ideal fabrication stand. The large 300 mm V-head and heavy-duty 5-leg design provide the welders maximum safety margin for pipes up to 900 mm in diameter. With any accessories, such as the heavy-duty rollers, pipes weighing up to 2,000 kg per Maxi Flex can be easily moved from the storage rack... to the welding cabin... and on to the shipping area. Thus, loads only have to be lifted once and handling costs are reduced accordingly by 50 % or more.

The Maxi Flex is excellent for levelling loads when aligning or for use together with a pipe turning device.

- Sturdy tubular construction
- Fine-tuning
- Quick-acting parking brake
- Delivery incl. V-head (Steel)

Part No.	Description	Max. Height mm	Weight kg
RG350090	Mobile pipe stand MAXI FLEX incl. casters / steel roller head	1.080	55,0
RG350146	V-head with PU rolls (set)	-	16,0
RG350147	V-head with stainless steel rolls	-	20,0

Pipe cart

Transports pipes up to 450 kg

Transport of up to 6,1 m long and up to 450 kg heavy pipes with a diameter of up to 300 mm possible

- Quick-release handle for compact storage
- Ideal for transporting materials on construction sites
- Total weight only 36 kg

Attach the pipe to the upturned cart with the ratchet strap.

Turn the cart & pipe over using the handle on the side.

Move handle

Part No.	Description	Weight kg
RG350247	Pipe cart	36,0

OTHER ACCESSORIES

Useful products and tools

Centering head for pipes

Solutions for pipe diameters 1/2 - 24"

The DWT centering head is the easiest way to determine the angle of inclination for pipe slopes. It can also be used to find any given point at an angle from the head of the pipe. The centering head can be used on all pipes with a diameter from 1/2" to 5".

- With graduation and protractor bubble for marking out
- Adjustable protractor bubble with graduation
- Hardened centering pin

Part No.	Description	Range	Weight
RG350032	Centering head DWT	1/2 - 5"	0,3
RG350190	Centering head XL DWT	1 - 24"	0,6

Marking tape

Suitable for pipe diameter 3 - 12"

Ideal tool for marking out the outer surface of pipes. Thanks to the imprint and the stable edges, angle markings and straight lines are easy to set.

The asbestos-free material can withstand temperatures of up to 288 °C to approx.

Part No.	Description	Dimensions	Range OD Inch	Range OD mm
RG350280	Marking tape M	10 cm x 1,2 m	3 - 6"	75 - 150
RG350281	Marking tape L	10 cm x 1,8 m	3 - 10"	75 - 250
RG350282	Marking tape XL	12,5 cm x 2,1 m	4 - 12"	100 - 300

DWT Flange leveler

Bolt spacing from 60 to 260 mm

The flange leveler level is suitable for flanges with bolt diameters from 16 mm to 32 mm. With this tool, incorrect positions of parts are prevented and no further adjustment tools are required. The bolt spacing can be varied continuously from 60 mm to 260 mm so that the bolt holes are kept in balance.

Specification

Dimensions	400 x 50 x 23 mm
Bolt length	75 mm
Bolt distance	60 - 260 mm

Part No.	Description
RG350030	DWT Flange leveler

DWT Digital flange leveler

with digital protractor

- Automatic rotation of the display
- Measuring range +/- 90 °
- Measurable inclination in °, %, inch and mm
- Automatically rotatable display indicator

Specification

Dimensions	400 x 50 x 23 mm
Bolt length	75 mm
Bolt distance	60 - 260 mm
Measurable inclination	+/- 90 °

Part No.	Description
RG350031	DWT Digital flange leveler

Hydraulic flange spreader

with built-in pressure cylinder

- Ideal for spreading flanges during maintenance work
- Hardened materials
- Built-in impression cylinder
- Simple operation
- Corrosion protected

Part No.	Description	Max. spreading force t	Max. Operating pressure bar	Weight kg
RG350277	Hydr. flange spreader - 2 t spreading force	2	800	8,8

Hydraulic flange spreaders

Spreading force up to 15 t

- Ideal for spreading flanges during maintenance work
- Interchangeable spreader plates (ribbed and stepped)
- Hardened materials
- Simple operation
- Corrosion protected
- Min. gap distance 5 mm

Part No.	Description	Max. spreading force t	Max. Operating pressure bar	Weight kg
RG350270	Hydr. flange spreader - serrated	15	700	3,2
RG350271	Hydr. flange spreader - stepped	15	700	3,2
RG350273	Hand pump - two-stage	-	700	2,6

Mechanical flange spreader

Bolt diameter: 16 - 25 mm

With the flange spreaders, pipe flanges can be separated or lifted quickly, safely and easily within seconds in order to carry out maintenance.

- 4 Various models to cover all flange sizes
- Hardened wedge for safe cutting
- Spindle can be turned with conventional spanner or 12 mm round bar
- Large feed spindle

Part No.	Description	Spreading diameter mm	Bolt diameter mm	Weight kg
RG350175	Flange spreader FS-76	76	16	5,2
RG350176	Flange spreader FS-101	101	19	5,4
RG350177	Flange spreader FS-127	127	22	6,0
RG350178	Flange spreader FS-162	162	25	6,6
